“

“We used four Kenai stacked Stone pillars for our new covered deck this summer. They were super easy to install, and look like a million bucks. Everyone that sees them thinks it's real stone, and we get a lot of compliments! The customer service was also 5 stars from GenStone. Would highly recommend to anyone!”

—Meredith, Kansas City, MO

Kenai Color Profile Inspiration

One of our distributors in Alaska is Spenard Builders Supply, a retailer of building materials and home improvement hardware. One of Spenard's flagship locations is in Kenai, Alaska, a coastal city just a few miles southwest of Anchorage. When we visited this location for the first time, we were awestruck by the natural beauty that surrounds this part of the state. The hilltops and mountains in Kenai are bedecked by some of the most beautiful, earthen colors we've ever seen: deep browns, subdued charcoals, and raw whites. After our very first trip there, we knew we had to replicate these colors and bring them to our customers.

That's when we got our designers together in a room, sat down with our color palettes, and went to work creating the Kenai stacked stone color theme. The response from our customers has been fantastic, and Kenai continues to be one of our best-selling faux stone color choices.
