**GRACE SELECT™** smooth surface roofing underlayment is composed of a rubberized asphalt adhesive laminated to a strong slip-resistant film. This lightweight product makes it faster and easier to install than granulars while meeting or exceeding industry standards for roofing underlayments.

*"After using several brands of granular underlayments over the years, I am glad I discovered **GRACE SELECT™**. **GRACE SELECT™** is definitely better than any granular underlayments out there and does a much better job. Since it is lightweight, it is easier to work with. Also, it is made by GCP, which gives me peace of mind that my clients' roofs are well protected. Overall, I am very satisfied with **GRACE SELECT™**."*
