DIVISION: 07 00 00—THERMAL AND MOISTURE PROTECTION
Section: 07 25 00—Water-Resistive Barriers/Weather Barriers
Section: 07 27 00—Air Barriers

REPORT HOLDER:
E.I. DuPONT DE NEMOURS & COMPANY, INC. (DuPONT™)
DuPONT BUILDING INNOVATIONS

EVALUATION SUBJECT:
DuPONT™ TYVEK® HOMEWRAP®–STYLE 1055B;
DuPONT™ TYVEK® STUCCOWRAP®–STYLE 1062X;
DuPONT™ TYVEK® DRAINWRAP®–STYLE 1063X;
DuPONT™ TYVEK® COMMERCIALWRAP®–STYLE 1162B;
DuPONT™ TYVEK® COMMERCIALWRAP® D-STYLE 1083;
AND DUPTONTM TYVEK® HEADERWRAP®

1.0 EVALUATION SCOPE
1.1 Compliance with the following codes:
- 2015, 2012 and 2009 International Residential Code® (IRC)
- Other Codes (see Section 8.0)

Properties evaluated:
- Water resistance
- Surface-burning characteristics
- Air leakage
- Wall draining characteristics (DuPont™ Tyvek® StuccoWrap®–Style 1062X, DuPont™ Tyvek® DrainWrap™–Style 1063X and DuPont™ Tyvek® CommercialWrap® D-Style 1083 only) for EIFS and one-coat stucco
- Exterior walls of Types I, II, III and IV construction

1.2 Evaluation to the following green codes and/or standards:
- 2016 California Green Building Standards Code (CALGreen), Title 24, Part 11
- 2012 and 2015 International Green Construction Code® (IgCC)

2.0 USES
DuPont™ Tyvek® HomeWrap®—Style 1055B; DuPont™ Tyvek® StuccoWrap®—Style 1062X; DuPont™ Tyvek® DrainWrap™—Style 1063X; DuPont™ Tyvek® CommercialWrap®—Style 1162B; DuPont™ Tyvek® CommercialWrap® D-Style 1083; and DuPont™ Tyvek® HeaderWrap® are used as water-resistive barriers on the exterior side of exterior walls of buildings of any construction type under the IBC and construction permitted under the IRC, except as noted in Section 4.5. They are equivalent to Grade D paper with a 60-minute water-resistance rating as described in 2012 and 2009 IBC Section 2510.6 and IRC Section R703.6.3. All products may be used as air barrier materials under IRC Section N1102.4.1 and IECC Sections 402.4 and 502.4.

In addition, DuPont™ Tyvek® StuccoWrap®—Style 1062X, DuPont™ Tyvek® DrainWrap™—Style 1063X and DuPont™ Tyvek® CommercialWrap® D-Style 1083 may be used as components of an EIFS or one-coat stucco drainage system as described in Section 4.4.

3.0 DESCRIPTION
3.1 General:
The products described in this report are comprised of nonwoven, flash spunbonded, nonperforated, olefin sheets that are manufactured from high-density polyethylene fibers combined with an ultraviolet stabilizing additive. The products have been bonded by heat and pressure into sheets with variations as described in Sections 3.2 through 3.6.

All products have a flame spread index of less than 25 and a smoke-developed index of less than 450, when tested in accordance of ASTM E84.

The sheet materials have an air leakage rate not exceeding 0.02 L/s-m² [0.004 cfm/ft² at 0.3 w.g. (1.57 psf)] when used as an air barrier material.

The attributes of the water-resistive barriers have been verified as conforming to the requirements of (i) 2016 CALGreen Section 5.407.1 for water-resistive barriers and Section A4.407.5 for air barriers; (ii) 2015 and 2012 IgCC Section 605.1.2.1 for air barriers; (iii) 2014 ASHRAE 189.1 Section 7.3.1.1 and 2011 ASHRAE 189.1 Section 7.4.2.9 for air barriers; (iv) 2015 and ICC 700-2012 Section...
sheathing in exterior plaster applications, two layers of a water-resistive barrier must be applied over sheathing in accordance with IBC Section 2510.6 or IRC Section R703.6.3. For cementitious coatings or exterior insulation and finish systems, application must be in accordance with the evaluation report on the exterior coating.

4.3 Air Barrier Material:
When used as an air barrier material or as a component of an air barrier assembly, the products must be installed in accordance with the manufacturer's published installation instructions and this report.

4.4 Wall Covering Assembly with Drainage:
The assembly described in this section complies with Section 4.5 of the ICC-ES Acceptance Criteria for EIFS Clad Drainage Wall Assemblies (AC235) and Section 3.2.10 of the ICC-ES Acceptance Criteria for Cemntitious Exterior Wall Coatings (AC11). The assembly is limited to Type V construction, and may be used in Group R, Division 1, and 3, Occupancies. The system consists of minimum 1/16-inch-thick (11.1 mm) Exterior or Exposure 1 plywood or Exposure 1 oriented strand board applied to wood studs spaced a maximum of 16 inches (406 mm) on center and fastened in accordance with the requirements of Chapter 23 of the IBC or Chapter 6 of the IRC. Vertical board edges must butt over studs. DuPont™ Tyvek® StuccoWrap® –Style 1062X, DuPont™ Tyvek® DrainWrap™ –Style 1063X or DuPont™ Tyvek® CommercialWrap® D-Style 1083 must be applied as described in Section 4.2. For EIFS, minimum 1-inch-thick (25.4 mm) flat or grooved face Type I expanded polystyrene (EPS) foam plastic boards, recognized in a current ICC-ES evaluation report as complying with ASTM C 578, are placed over the Tyvek® StuccoWrap®, Tyvek® DrainWrap™ or Tyvek® CommercialWrap® D and fastened to the sheathing along the EPS edges and midway between the horizontal edges. The fastener spacing must not exceed 24 inches (610 mm) on center along the EPS edges. For midway locations, the fastener spacing must not exceed 16 inches (406 mm) on center and fasteners must be located within 16 inches (406 mm) of the horizontal edges. Fasteners consist of wood screws sized to meet wind resistance requirements, with minimum 1/4-inch-diameter (45 mm) plates or washers, and penetrating a minimum of 1/4 inch (6.4 mm) through the sheathing. Weep screeds, as set forth in IBC Section 2512.1.2 or IRC Section R703.6.2.1, must be installed. The EIFS base coat, fabric and finish coat must be installed over the EPS in accordance with the EIFS manufacturer’s ICC-ES evaluation report. The one-coat stucco system must be installed in accordance with the manufacturer's ICC-ES evaluation report.

4.5 Exterior Walls of Types I, II, III and IV Construction:

4.5.1 DuPont™ Tyvek® HomeWrap® –Style 1055B; DuPont™ Tyvek® StuccoWrap® –Style 1062X; DuPont™ Tyvek® DrainWrap™ –Style 1063X; and DuPont™ Tyvek® HeaderWrap® may be used on exterior walls of Types I, II, III or IV construction 40 feet or less above grade plane. The use is not limited to any specific assembly, except where the wall assembly uses foam plastic insulation it must also comply with the requirements of IBC Section 2603.5.

4.5.2 The DuPont™ Tyvek® CommercialWrap® –Style 1162B and DuPont™ Tyvek® CommercialWrap® D-Style 1083 may be used as a component of exterior walls of buildings of Type I, II, III or IV construction as follows:

Under the 2015 IBC: Use on exterior walls greater than 40 feet in height is not limited to any specific wall assembly
where the DuPont™ Tyvek® CommercialWrap®–Style 1162B and DuPont™ Tyvek® CommercialWrap® D-Style 1083 is the only combustible material as provided for in 2015 IBC Section 1403.5, Exception 2. Where the wall assembly does not meet the requirements of IBC Section 1403.5, Exception 2, the use on exterior walls greater than 40 feet in height above grade is limited to the assemblies described in Table 1. The use on exterior walls of Types I, II, III or IV construction 40 feet or less above grade plane is not limited to any specific assembly, except that wall assemblies that use foam plastic insulation must also comply with the requirements of IBC Section 2603.5.

Under the 2012 IBC: Use on exterior walls greater than 40 feet in height above grade is limited to the assemblies described in Table 1. The use on exterior walls of Types I, II, III or IV construction 40 feet or less above grade plane is not limited to any specific assembly, except that wall assemblies that use foam plastic insulation must also comply with the requirements of IBC Section 2603.5.

Under the 2006 and 2009 IBC: Use on exterior walls greater than 40 feet in height above grade is not limited to any specific assembly, except that wall assemblies that use foam plastic insulation must also comply with the requirements of IBC Section 2603.5.

5.0 CONDITIONS OF USE

The DuPont™ Tyvek® products described in this report comply with, or are suitable alternatives to what is specified in, those codes listed in Section 1.0 of this report, subject to the following conditions:

5.1 The products must be installed in accordance with the manufacturer's published installation instructions, the requirements of the applicable code and this report. In the event of a conflict between this report and the manufacturer's published installation instructions, this report governs.

5.2 The water-resistive barriers must be covered by an exterior wall finish complying with the requirements of the applicable code.

5.3 When DuPont™ Tyvek® StuccoWrap®–Style 1062X, DuPont™ Tyvek® DrainWrap™–Style 1063X or DuPont™ Tyvek® CommercialWrap® D-Style 1083 are used in an EIFS wall covering assembly with drainage or a one-coat stucco assembly as described in Section 4.4, the assembly must be specifically recognized in the evaluation report on the EIFS or one-coat stucco.

5.4 This report provides air leakage rates for the products as an air barrier material only. When used as a component of an air barrier assembly, the design and evaluation of the air barrier assembly of which they are a component must be provided to the satisfaction of the code official.

5.5 Use of DuPont™ Tyvek® CommercialWrap®–Style 1162B and DuPont™ Tyvek® CommercialWrap® D-Style 1083 on exterior walls of buildings of Type I, II, III or IV construction must be in accordance with the requirements of Section 4.5 for the applicable edition of the code.

6.0 EVIDENCE SUBMITTED

6.1 Data in accordance with the ICC-ES Acceptance Criteria for Water-resistive Barriers (AC38), dated January 2015.

6.2 Data in accordance with Section 4.10 of the ICC-ES Acceptance Criteria for EIFS Clad Drainage Wall Assemblies (AC235), dated January 2015.

6.3 Report of testing in accordance with ASTM E84.

6.4 Reports of testing in accordance with ASTM E2178.

6.5 Reports of testing in accordance with NFPA 285 with related engineering analysis.

6.6 Reports of testing in accordance with ASTM E1354.

7.0 IDENTIFICATION

7.1 The products described in this report are identified by a label on the container of each roll of membrane, and by printing on the product that includes the report holder's name, address, and telephone number; the product name; and the evaluation report number (ESR-2375).

7.2 The report holder's contact information is the following:

8.0 OTHER CODES

8.1 Evaluation Scope:

In addition to the codes referenced in Section 1.0, the products covered in this report were evaluated for compliance with the requirements of the following codes:

- 2006 International Residential Code® (2006 IRC)
- 2003 International Residential Code® (2003 IRC)

8.2 Uses

See Section 2.0.

8.3 Description

See Section 3.0.

8.4 Installation

See Section 4.0.

8.5 Conditions of Use

See Section 5.0.

8.6 Evidence Submitted

See Section 6.0.

8.7 Identification

See Section 7.0.

<tr>
<td></td>
<td>9. Concrete Panels: Minimum 2-inch-thick panel, with a 2-inch maximum air gap between exterior insulation and concrete panel.</td>
</tr>
<tr>
<td></td>
<td>10. Insulated Concrete Sandwich Panels: Minimum 2-inch-thick outer and inner faces. Maximum 2-inch air gap between panel and wall system.</td>
</tr>
</tbody>
</table>

For St: 1 inch = 25.4 mm; 1 lb/ft² = 16 kg/m²

Notes:
1 On insulation joints, an asphalt or butyl-based flashing tape with a 4 inch maximum width may be used.
2 Use any header treatment shown in Window Head Detail Options, Figures 2 through 7 for all window and door openings in the exterior wall.
3 Exterior claddings must comply with the applicable provisions of IBC Chapter 14 and IRC Chapter 7
FIGURE 1
Refer to Table 1 for system components.

FIGURE 2
FIGURE 3
1.0 REPORT PURPOSE AND SCOPE

Purpose:
The purpose of this evaluation report supplement is to indicate that DuPont™ Tyvek® products, recognized in ICC-ES main evaluation report ESR-2375, have also been evaluated for compliance with the codes noted below.

Applicable code edition(s):
- 2016 California Building Code (CBC)
- 2016 California Residential Code (CRC)
- 2016 California Energy Code (CEC)

2.0 CONCLUSIONS

2.1 CBC:
The DuPont™ Tyvek® products, described in Sections 2.0 through 7.0 of the main evaluation report ESR-2375, comply with CBC Chapter 14, provided the design and installation are in accordance with the 2015 International Building Code® (IBC) provisions noted in the main report and the applicable provisions of the CBC. Use as an air barrier must be in accordance with CEC.

The products have not been evaluated under Chapter 7A for use in the exterior design and construction of new buildings located in a Fire Hazard Severity Zone within State Responsibility Areas or any Wildland–Urban Interface Fire Area.

2.1.1 OSHPD:
The applicable OSHPD Sections of the CBC are beyond the scope of this supplement.

2.1.2 DSA:
The applicable DSA Sections of the CBC are beyond the scope of this supplement.

2.2 CRC:
The DuPont™ Tyvek® products, described in Sections 2.0 through 7.0 of the main evaluation report ESR-2375, comply with CRC Chapter 7, provided the design and installation are in accordance with the International Residential Code® (IRC) provisions noted in the main report and the applicable provisions of the CRC. Use as an air barrier must be in accordance with the CEC.

The products have not been evaluated under CRC Section R337 for use in the exterior design and construction of new buildings located in a Fire Hazard Severity Zone within State Responsibility Areas or any Wildland–Urban Interface Fire Area.

The products recognized in this supplement have not been evaluated for compliance with the International Wildland–Urban Interface Code®.

This supplement expires concurrently with the evaluation report, reissued October 2019.
