

10 reasons why TYPAR® is reaching new heights.

1. The Best Warranty in the Business.

Only the complete TYPAR® Weather Protection System offers the security of a lifetime limited product warranty (for single-family residential applications) plus an incredible 10-year warranty on labor and materials (restrictions apply, see warranty for details).

2. The Best Balance of Water Holdout and Perm Rating.

A weather barrier system's effectiveness is measured by the combined performance of water holdout and perm-rating. TYPAR offers the best balance, which helps prevent moisture — and the problems associated with moisture — in wall cavities.

3. Unbeatable Tear Strength.

A TYPAR weather barrier withstands the rigors of the jobsite. Grab tensile strength is the preferred testing method for tear strength, and Typar performs at more than twice the industry standard.

4. Optimal Moisture Vapor Transmission.

The average home generates 3 to 6 gallons of moisture vapor each day, a lot of which dissipates into the wall cavities. TYPAR delivers the ideal MVT rate, allowing moisture vapor to escape from the wall cavities, which helps prevent mold, mildew and water damage. TYPAR weather barriers will not absorb or retain water either.

5. Superior Air Holdout.

TYPAR provides superior air barrier performance in addition to preventing air leakage through gaps, cracks, or penetrations, resulting in improved energy efficiency.

6. Excellent Surfactant Resistance.

TYPAR will not degrade over time due to surfactants. TYPAR successfully resists cedar oil from siding and soaps from powerwashing.

7. Outstanding UV Performance.

Ultraviolet stability is vital to the performance of a weather barrier before it's covered. Even limited exposure to ultraviolet rays causes other weather barriers to deteriorate. UV inhibitors are in TYPAR weather barriers' coating as well as its fibers, providing the ultimate in UV protection.

8. High Slip Resistance.

TYPAR weather barriers offer a high co-efficient of friction against OSB board. Ladders are also less likely to slip when leaned against TYPAR versus other competitive products.

9. Easy to Handle and Install.

TYPAR is less reflective than its biggest competitors and is less noisy.

10. A Total System for Your Needs.

From the roof to the foundation, TYPAR offers a complete line of weather resistant barriers for your applications: TYPAR® HouseWrap, TYPAR® StormWrap™ (for high wind), TYPAR® MetroWrap™ (for commercial applications), TYPAR roof underlayments, plus construction tape and three kinds of flashing. All TYPAR Weather Protection System components are backed by a 10-year warranty when installed properly and together as a system.

The TYPAR® Weather Protection System

TYPAR Roof Underlayments

TYPAR HouseWrap
TYPAR StormWrap™

TYPAR Flashings

TYPAR Construction Tape

The TYPAR Weather Protection System is the smart choice for your homes. Better yet, it provides the added protection and security of a lifetime limited product warranty (for single-family residential applications) plus an incredible 10-year warranty on labor and materials (restrictions apply, see warranty for details). That's peace of mind for you and your homebuyers.
