

CODE-COMPLIANT

STRUCTURAL SCREWS

CAMO® offers a full line of high-performing, code compliant structural screws for all your deck, framing, and general construction needs. They are engineered to start fast, drive smooth, and hold strong. No pre-drilling required.

PROTECH™ **ULTRA 4** COATING
INDUSTRY LEADING COATING SYSTEM

Our proprietary PROTECH Ultra 4 four-layer coating system protects your connections against the harshest environmental elements. Each layer works together to provide optimum corrosion resistance, UV and environmental protection, and torque reduction for a high-performing, long-lasting screw. Tested in accordance with ASTM G198, the coating meets or exceeds the protection of code-approved hot-dip galvanized (ASTM A153, Class D), in ground contact general use pressure treated lumber (AWPA UC1-UC4A).

LAB TESTED
HIGHEST
RATED COATING

Our coating is tested 2X longer than industry standard - so you can be confident your connections will last.
