SUPERIOR COATINGS

Typical Interior Use

Corrosion Protection:
Medium

Typical heated, dry room environments with clean air (low or no condensation / minimal outdoor exposure) such as homes, shops, offices, schools, hotels, etc. Environmentally friendlier than any Yellow Zinc that contains Chromium 6.

- ZYTEC™+

Typical Exterior Use

Corrosion Protection:
High

Compatible with most above ground pressure treated lumber. For ground contact treated lumber, areas within one mile of saltwater, near swimming pools, exposure to corrosive chemicals, or other areas where corrosion is more like to occur, use proper grade **Stainless Steel**.

- ZYTEC™ GX
- ZYTEC™ XT

Tough Environments

Corrosion Protection:
Very High

Outdoor coastal areas, surfaces with salt exposure, shipyards, ground contact treated lumber, medium polluted industrial areas, chemical plants, etc.

- 316 STAINLESS STEEL
- STAINLESS STEEL *

* Our Gen II Products marked "Stainless Steel" are Austenitic Stainless Steel AISI 305 or better!

Always follow timber manufacturer's recommendations for fasteners!

GEN II

**THE
ULTIMATE
FASTENERS**

INTERIOR

STRUCTURAL

AXIS™

Horizon Curve™

A slight curvature of the head for elegant, professional, architectural results. The Finish Ring underneath the head also provides a better finish by cutting the top fibers in the wood for an extra step in countersinking.

Turbine Ribs™

(patent pending) Turbine Ribs cut quickly into the wood, leaving a professional, clean finish with maximum wood contact. The cup shaped, countersinking head provides increased holding power and reduced risk of splitting.

Twin Blades™

(patent pending) This set of knurls cuts fast to dramatically reduce friction and heat on the shank, while reducing load on the drill. They also provide better performance by removing debris faster than a standard fastener's knurl.

Fast Start Tip

With sharp threads all the way to the tip, the fastener has an immediate grip for a fast start. The inset thread cut drastically reduces the splitting effect and minimizes the driving torque needed to engage the wood.

This advanced, General Purpose Structural Wood Screw is for typical interior, medium-corrosive environments. Use them on any size job or project from framing to small wood working!

Available in 1lb, 5lb and 1/4 Keg
All Packaging Includes Drive Bit!

THE ULTIMATE FASTENERS

INTERIOR

STRUCTURAL

The AXIS™ Structural Wood Screw is the next step in fastener design. Every facet has been evaluated and improved (patents pending). Our extra sharp Fast Start Tip saves you time onsite and the Twin Blades outperform the competitor's knurls. The Turbine Ribbs ensure an incredibly clean finish. Its cup shaped, countersinking head, provides unparalleled holding power and less risk of splitting the wood. The Horizon Curve Head has been architecturally engineered to leave an elegant finish.

Sizes Available: #8 x 1" to #10 x 6"

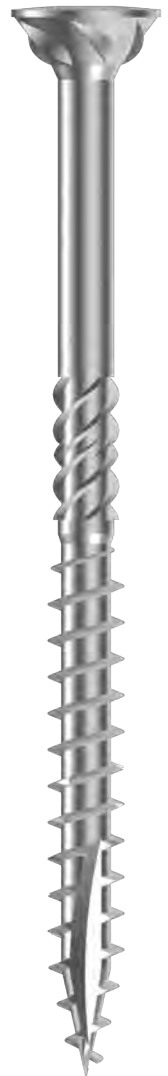

TYPICAL INTERIOR USE

ZYTEC™+ Coating: Typical heated, dry room environments with clean air (low or no condensation/minimal outdoor exposure) such as homes, shops, offices, schools, hotels, etc. Environmentally friendlier than any Yellow Zinc that contains Chromium 6. Always follow timber manufacturer's recommendations for fasteners.

Common Applications

- Commercial & residential
- General indoor jobs
- Remodeling and repair
- Interior framing
- Trim work & Cabinetry
- Windows and doors
- Post and beam & much more!

FINISH HEAD SCREW

PICO™

Tiny Finish Head

The tiny finishwork head has been specifically engineered to be almost invisible when installed without compromising strength of the head or screw. The head size fits with concealed mounting tools.

Reverse Threads

The reverse threads helps to pull down debris and works perfectly together with the small head size to create a clean finish.

Fast Start Tip

With sharp threads all the way to the tip, the fastener has an immediate grip for a fast start. The inset thread cut drastically reduces the splitting effect and minimizes the driving torque needed to engage the wood.

Also For Concealed Fastening

For jobs where concealing the fastener is important, we have engineered these screws to fit most concealed fastening tools.

This advanced, Finish Head Wood Screw with ZYTEC™ GX corrosion protection coating is for typical high-corrosive exterior and interior environments. Great for any size job or project.

INTERIOR/EXTERIOR

CABINETS & MORE

AURA™

Aesthetic Design Mushroom Head

The aesthetic head design is shaped to compliment a clean finish in cabinetry, furniture, and more. The head is bold to show its architectural shape and decorates visible surfaces.

Graduated Shoulder

The bigger head increases holding power on the wood, while the graduated shoulder from head to shank ensures maximum strength for the fastener head.

Fast Start Tip

With sharp threads all the way to the tip, the fastener has an immediate grip for a fast start. The inset thread cut drastically reduces the splitting effect and minimizes the driving torque needed to engage the wood.

Excellent For Joinery Tools

Size #8 head has been designed to fit perfectly with most pocket joinery tools on the market. Excellent for cabinetry and more! Kreg Jig® compatible.

This advanced, Cabinetry (& more!) Wood Screw with ZYTEC™ GX corrosion protection coating is for typical high-corrosive exterior and interior environments. Great for any size job or project.

Available in 1lb, 5lb and 1/4 Keg
All Packaging Includes Drive Bit!

THE ULTIMATE FASTENERS

INTERIOR/EXTERIOR

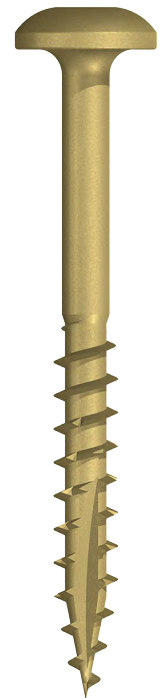

CABINETS & MORE

The AURA™ screw features an aesthetic design of the mushroom head shaped to fit in cabinetry, furniture and more. The large diameter head of the fastener ensures increased holding power. The head size on the #8 version has been designed to fit most pocket joinery tools on the market. Our extra sharp Fast Start Tip allows the screw to grip quickly into the wood providing easy installation.

Sizes Available: #8 x 1" to #10 x 3"

General Info			
Type of Screw	General Purpose Wood		
Material	Heat Treated, Hardened Steel		
Coating	ZYTEC™ GX		
Head Style	Mushroom TX20 Star Drive		
Point Type	Modified Type 17		
Construction		#8	#10
Head diameter (inch)		0.362	0.476
Minor thread diameter		0.106	0.136
Major thread diameter		0.165	0.211
Shaft diameter		0.122	0.154
Drive Size		TX20	TX20
Product Range		Approx Count per 1lb	
Length	Thread	#8	#10
1"	3/4"	215	126
1-1/4"	7/8"	187	108

2"	1-1/4"	131	77
2-1/2"	1-1/2"	108	63
3"	1-1/2"		54
Also Available with White Painted Head			

TYPICAL EXTERIOR USE

ZYTEC™ GX Coating: For general outdoor use. Compatible with most above ground pressure treated lumber. For ground contact treated lumber, areas within one mile of saltwater, near swimming pools, exposure to corrosive chemicals, or other areas where corrosion is more like to occur, use proper grade **Stainless Steel**. Always follow timber manufacturer's recommendations for fasteners.

Common Applications

- Commercial & residential
- General indoor and outdoor jobs
- Cabinetry
- #8 version is great for pocket joinery
- Vinyl & aluminum screens and doors
- Furniture manufacturing
- And Much more!

STRUCTURAL LAG

NOVA™

TER 2010-03
Technical Evaluation Report
available now at
www.screw-products.com

Horizon Curve™

A slight curvature of the head for elegant, professional, architectural results. Whether countersinking or surface mounting, the results are impressive!

Locking Wedges

The locking wedges help to mill and countersink the head into the wood for a clean finish. It also locks the head into place preventing unwanted future movement.

Twin Blades™

(patent pending) This set of knurls cuts fast to dramatically reduce friction and heat on the shank, while reducing load on the drill. They also provide better performance by removing debris faster than a standard fastener's knurl.

Fast Start Tip

With sharp threads all the way to the tip, the fastener has an immediate grip for a fast start. The inset thread cut drastically reduces the splitting effect and minimizes the driving torque needed to engage the wood.

The advanced, Heavy Duty Structural Lag Screw with **ZYTEC™ GX** corrosion protection coating is for typical high-corrosive, exterior, and interior environments. Great for any size job or project.

Available in 50ct, 100ct and Bulk.
All Packaging Includes Drive Bit!

WOOD TO STEEL

ROCO™

Horizon Curve™

A slight curvature of the head for elegant, professional, architectural results. The Finish Ring underneath the head also provides a better finish by cutting the top fibers in the wood for an extra step in countersinking.

Turbine Rib™

(patent pending) Turbine Ribs cut quickly into the wood, leaving a professional, clean finish with maximum wood contact. The cup shaped, countersinking head provides increased holding power and reduced risk of splitting.

Unique Wing Design

The unique wing design is engineered to mill an oversize hole in the wood without breaking. As soon as the wings reach the steel, they easily break off, allowing the threads to tap into the steel base.

Superior Drill Point

The drill point has been specifically engineered to penetrate the steel as fast as possible. The angle and shape of the point makes it possible to remove steel chips fast and efficiently to enhance penetration.

This advanced, Wood to Steel Screw with **ZYTEC™ GX** corrosion protection coating is for typical high-corrosive, exterior, and interior environments. Great for any size job or project.

Available in 1lb, 5lb and 1/4 Keg

THE ULTIMATE FASTENERS

EXTERIOR

WOOD TO STEEL

The ROCO™ Wood to Steel screw is specifically designed for increased holding power and an incredibly clean finish. When engaging the wood, the screw effortlessly drills through the wood while the wings mill an oversized hole. When the screw engages the steel base, the oversized hole prevents threads from engaging the wood, lifting wood and steel apart (jacking). The specially engineered drill point cuts fast through the steel and the threads firmly clamp the wood and steel together.

TYPICAL EXTERIOR USE

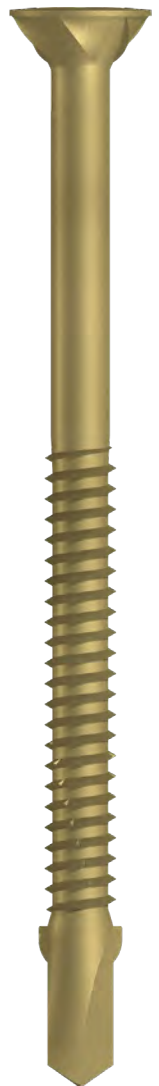

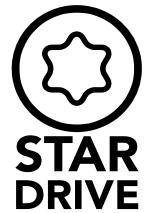

ZYTEC™ GX Coating: For general outdoor use. Compatible with most above ground pressure treated lumber. For ground contact treated lumber, areas within one mile of saltwater, near swimming pools, exposure to corrosive chemicals, or other areas where corrosion is more likely to occur, use proper grade **Stainless Steel**.

DeckLok® Advanced Lateral Anchor System

DeckLok® – The Original Lateral Anchor System – is revolutionizing the decking industry. The patented DeckLok system will provide a bolted connection at all critical structural locations of your deck. A single pair of DeckLok brackets will provide 4000 lbs of pull out resistance. DeckLok will also increase rail post connections by up to 500%. Great for the deck-to-ledger connection, stair stringer, rail post and more. You NEED DeckLok to meet code! See screw-products.com for instructions and video.

Item Number	Description	Net Wt
DL316SS	316 Stainless Steel Lateral Anchor	0.9 lbs
DLHDG	Hot Dip Galvanized Lateral Anchor	0.9 lbs

- For use with lumber or engineered flooring systems.
- Use with standard 1/2" hot-dipped galvanized or SS bolts.
- Code compliant hot-dipped galvanized or 316 stainless steel.
- Easy to install on existing structures or new construction
- One pair of DeckLok lateral anchors provides up to 4,000 lbs. of pullout resistance.
- DeckLok® is one of the most cost effective ways to consistently build a safe and secure deck and guardrail system.

 **Made In The USA!**

RailLok® Railing & Fence Section Connection

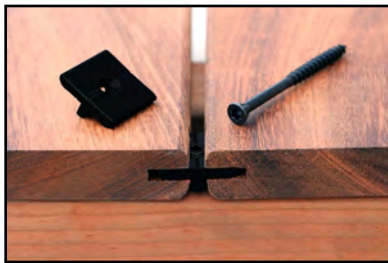

RailLok® is used to connect railing and fence sections to the rail post. Attach the brackets to the rail post using included screws and then slip pre-assembled railing or fence sections into the brackets and screw them in place. The RailLok brackets provide a strong, reliable fence section to post connection. The brackets are built to outlast the service life of the railing and fence sections.

Item Number	Description	Net Wt
RLBLK (also available in 4 Packs)	Black RailLok Bracket (Includes 5 Star Drive Screws)	0.2 lbs
RLWHT (also available in 4 Packs)	White RailLok Bracket (Includes 5 Star Drive Screws)	0.2 lbs

The Ultimate Concealed Deck Clip System

The Ultimate Concealed Deck Clip System! Milled with a marine grade aluminum clip and paired with a star drive black coated 305 stainless steel screw. Our clip requires no drilling or glue and is the easiest on the market to install! The aluminum clip holds decks more effectively than plastic clips and it's literally out of sight!

- ★ Holds deck more effectively than plastic clips
- ★ Black marine grade aluminum clip
- ★ Includes black stainless steel star drive screws
- ★ No drilling. No glue. No hassle.
- ★ Excellent for Rain Screens

Each unit contains:

- (175) Clips
- (175) 2-1/4" Star Drive Screws
- (10) 2-1/4" starter & finisher screws
- Hard Wood Plugs
- (1) TX20x2 Drive Bit
- Instructions

When using 5-1/2" wide decking, each jar will install 100 square feet of decking on 16" centers, or 150 square feet on 24" centers.

Item Number	Description	Net Wt	Package
DC175	Deck Clip System	3.3 lbs	1 Pack

D2W™ Deck2Wall Spacers

Deck2Wall Spacers vs Washers

Designed to easily and efficiently provide airspace between buildings and deck ledgers, stair stringers, shade structures, railing posts, fence posts, and more to help prevent rot. Deck2Wall Spacers are easy to install. Simply fasten the spacer to the ledger with properly sized screws or nails through the attachment holes prior to bolting the ledger to the structure. The large diameter provides greater bearing surface than standard washers.

HOLDSaBIT

Made In The USA!

Introducing the HOLDSaBIT! Simply the easiest and best way to hold multiple insert drill bit driver tips on your cordless drill or impact. It goes on and off in seconds and holds up to 16 - 1" bit drivers, as well as 1000's of combinations of bits. The HOLDSaBIT slips on a cordless drill or impact in seconds, providing channels that hold all the tips you need for your projects. Made of a proprietary blend which provides strength & holding power at the same time. UV rated for outdoor use. Fits all full sized cordless drill and drivers.

Here are a few things you can place in your HOLDSaBIT:

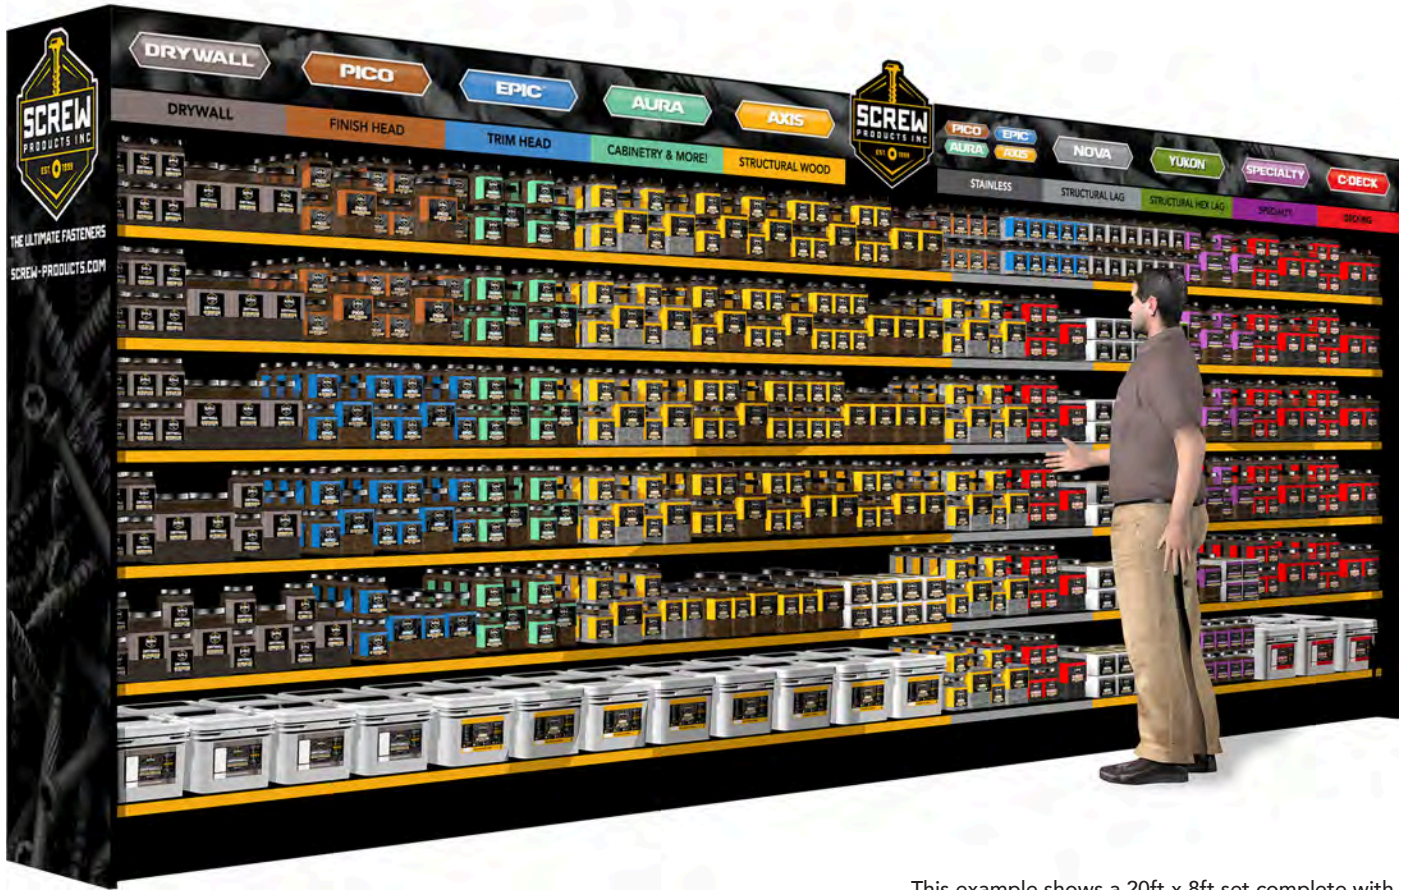

- Bits - Star, Torx, Square, Phillips, Straight - From 1" to 4"
- Hex shank drill bits • Nut drivers • Pencils/Pens
- Magnetic tip holders, and many, more tools
