DECKFAST® Fascia System

Fastening System for PVC and Composite Deck Fascia Boards

Deckfast® Fascia System is the ultimate fastening solution for PVC and composite deck fascia boards. It is recommended by Trex®, Duralife® and other leading manufacturers. The Fascia System is specifically designed to handle the large amount of expansion and contraction that can occur with many fascia boards, keeping them securely in place. The system consists of two precisely engineered components: (1) the pre-drilling and countersinking Fascia Tool, based on patented Smart-Bit® technology, and (2) specially-designed color matched Fascia Screws.

The Fascia Tool creates an over-sized hole for the Fascia Screw so that the board can expand and contract freely without applying significant force to the shank of the screw. Fascia Screws are available in both Headcote® stainless steel and epoxy coated carbon steel, in colors to match popular decking products. The Fascia System is designed for use with 1/2" to 3/4" fascia profiles.

Approved for use with ACO treated lumber. Follow the decking manufacturer's recommendation when selecting either stainless or epoxy coated screws. For applications exposed to salt air, near large bodies of water, swimming pools or other areas where corrosion is more likely to occur, use Marine Grade 316 Headcote® or Marine Grade 316 Headcote® Cap-Tor® xd.

1 Pre-drill with Fascia Tool

2 Drive Fascia Screw

Fascia Tool

Free Spinning Stop Collar with O-ring

The stop collar spins free of the drill bit, preventing marring or burnishing of the fascia board surface. When the stop collar stops spinning, the hole is complete.

Anti-clog Debris Cavity

The cavity gathers waste material, keeping it clear of the countersink.

Pre-set Countersink

The Fascia Tool matches the head diameter and countersink depth of the Fascia Screw, for the perfect hole and fit. Everything is pre-set in the tool assembly.

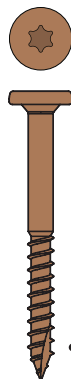

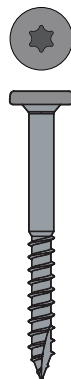

Pre-set Shaft Length

Together with the countersink, the overall hole depth is designed for use with fascia boards from 1/2" to 3/4" thick.

Fascia screws

Color Matched Stainless Steel and Epoxy Coated Steel

Fascia screws are available in a wide range of colors to match popular decking products. Stainless Fascia Screws are 9 x 1 7/8". Epoxy Coated Fascia Screws are 10 x 1 7/8".

T-20 Star Drive Recess

Favored by professionals.

Type 17 Auger Tip

For faster, easier entry; helps prevent splitting of treated lumber.
